

Larvicides

BONIDE MOSQUITO LARVICIDE OIL is designed for surface application to intermittently flooded areas, temporary rain pools, sloughs and ponds. It may be used all season long and does not depend on life cycle timing for effectiveness. It kills by suffocation and mosquitoes can not develop any resistance.

ProVect

PROVECT gives you a choice in time-tested Temephos larvicides. ProVect brand Temephos from AllPro is now available through Univar USA in a variety of formulations and your choice of carrier to best suit your application needs.

ProVect makes Temephos easier than ever to apply. Used worldwide in mosquito abatement programs since 1965, Temephos remains the gold standard of mosquito larvicides. Our new micro-prill carrier is less abrasive than sand, more free-flowing than other formulations and is virtually dust-free. The spherical shape penetrates through dense foliage and readily dissolves in water.

Summit Chemical Co.

B.T.I. BRIQUETS are floating sustained-release larvicide for the long-term control of mosquitoes. It controls mosquito larvae within 48 hours of application. Effective against 1st through 3rd Instar Larvae. These briquets may be used in all types of mosquito breeding areas. Summit Chemical Co. B.T.I. Briquets are formulated to release effective levels of Bti for a period of 30 days or more under typical environmental conditions.

Apply 1 Briquet per 100 sq. ft. of surface area.

TEKNAR HP-D is a high potency liquid Bti larvicide for mosquitoes and Blackfly control. Teknar HP-D may be applied to any water sites except treated, finished drinking water reservoirs or drinking water receptacles. Teknar HP-D is cost effective in habitats that tend to produce single broods of larvae upon flooding.

Teknar G is a granular Bti Larvicide for mosquitoes. It is ideal to use in areas where a granular formulation is needed to reach the target site, such as roadside ditches, woodland pools, pastures, salt marshes, rice fields, storm water retention areas and catch basins.

Teknar®
BIOLOGICAL LARVICIDE

ALTOSID is the best way to combat mosquitoes and the health risks they spread by eliminating the mosquito larvae that breed in standing water.

Available in multiple formulations, Altosid® controls mosquito larvae before they can develop into troublesome adults. Altosid® contains (S)-Methoprene, an insect growth regulator (IGR) that stops mosquitoes from becoming breeding, biting adults. Altosid® is target-specific, and will not affect fish, waterfowl, mammals or beneficial predatory insects.
